

Environment Policy of HESTRA/Martin Magnusson & Co AB

The Company will act as much as possible in a merciful manner to the environment. We shall economize on raw material and energy.

We will strive for producing gloves with high durability and quality to maintain the length of life for gloves. This also means that we minimize the consumption of raw material and thus minimize the strain on the ecological system.

We will meet and preferably exceed demands regarding laws and statutes in the environment area.

Waste shall as far as possible be sorted and reused or recycled for deposit.

The company is adhered to a system for recycling of package in Sweden called Reparegistret AB.

We will involve and continuously educate and train our staff regarding questions in connection to the environment.

We will strive for continuous improvements regarding our environment.

This policy of environment is approved by the board of HESTRA-Handsken and shall be well known and easily available for all employees.
